NICKY BUTTIGIEG

nickybu

Education

The University of Manchester (2018-2019)

MSc Advanced Computer Science

- Areas of study: machine learning, computer vision, parallel computing, text mining.
- Volunteered as a Student Representative.
- Societies: HackSoc, AI/ML, Nuclear Physics, Astronomy.
- Dissertation: Spiking Grid Cell Models on Neuromorphic Hardware

The University of Malta (2015-2018)

BSc (Hons) Information Technology (Software Development)

- Achieved a high second upper (2:1) honours degree.
- Student Representative for the Faculty of ICT.
- Involved in ICT Students Association (ICTSA).
- Dissertation: 'A Tool for Constructing and Visualising Bidirectional Scattering Distribution Functions.' *Keywords: computer graphics, physically-based rendering, light reflection.*

Goal

I have just finished my master's degree, and I am now temporarily based in Malta, looking to move up to London from early October.

With an academic background in software engineering and artificial intelligence, and some industry experience in software engineering, I am looking for a software/research engineer position with a company whose work interests and excites me.

Experience

Betsson Group (Jul 2017 - Dec 2017)

Software Development Intern

- Worked alongside CSTech team and managed the investigation of a legacy system and the design and implementation of an updated internal tool using PHP (Laravel), MySQL, HTML, CSS & JavaScript.
- Improved efficiency & reduced storage requirements by redesigning an unstructured Microsoft SQL database in MySQL, and carried out data cleansing to detect and correct inaccurate records.
- Gathered user requirements and ongoing user feedback from various departments.

Anadrom (Sep 2017 - Dec 2018)

Co-founder & backend engineer

- Co-founded a startup to build a community-based eSport coaching platform.
- Administered hosting & backend development in Laravel & MySQL.

Ricston Ltd (Feb 2016 - June 2017)

Software Engineer Intern

- Involved in the agile collaborative development of an analytical tool to find patterns based on geo-tagged data maintained using ElasticSearch, Kibana & Logstash.
- Implemented custom OAuth 2.0 system using Java Spring Boot and MySQL.
- Liaised with Formula Student to develop a dashboard for visualising real-time car sensor data.

Technical Skills

Languages: Python, Java, C/C++, C#, MATLAB, PHP, SQL, HTML, CSS, JavaScript
Frameworks/Technologies: Linux, Git, Docker, Scikit-Learn, PyNN, Microsoft Azure, ElasticSearch, Laravel, OpenGL, Unity3D, Cinema4D, Django,

Hackathons

- Google Hash Code. (2016/17/19)
- OxfordHack (2018)
- First place among student teams in 'Game of Codes'. (2017)
- Runner up in 'The Million Dollar Idea' startup competition. (2016)
- Second place in educational STEM game hackathon organised by MITA. (2016)

Interests

- Reading books & comics
- Hiking
- Animation, rendering & VFX
- Podcasts
- Space exploration
- Tech seminars & meetups
